

making hard work easier

For 60 years, our tools and machines
have been making hard work easier.

Today, we are world market leader
and define the handling of building
materials on construction sites and in
concrete plants.

Protective Mat SXR for Vibration Plates

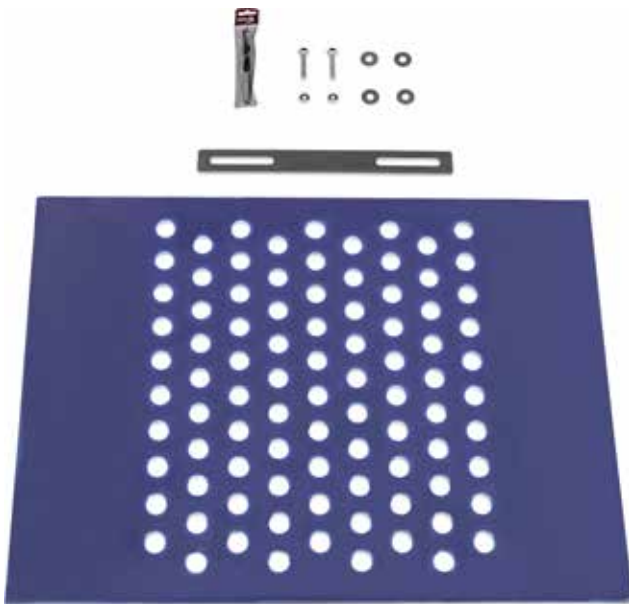

Distribute jointing material quickly,
gently and over a wide area

 **probst**
handling equipment

Protective Mat SXR

Distribute jointing material in paving joints more efficiently

The integrated honeycomb technology of the protective mat serves as a reservoir for the jointing material. The recesses minimise the slowing down of the vibration plate due to accumulated sand piles.

Damage to paving stones with a textured surface, clay stones, natural stones and pavement slabs is also significantly reduced when using the protective mat. The result is an area-wide distribution of the joint material and an intact substrate.

- Suitable for almost all vibrating plates
- Honeycomb polyurethane mat 760 x 560 x 10 mm (L x W x H)
- Also suitable for reversible vibrating plates (forward as well as reverse)
- Optional extra: second clamping strip to be able to attach the protective mat to the front and rear of the vibrator if required.

Vibration plate without holes

Probst Protective Mat SXR

Scope of delivery Protective Mat SXR:

Set consisting of plastic mat, clamping strip, screws and drill bit

Type	Description	Dimensions L x W x H mm (in)	Dead Weight kg (lbs)	Order- Number
SXR	Protective mat for vibration plates incl. fixing material	760 x 560 x 10 (30 x 22 x ¼)	6,82 (15)	41350014
