Turning Device for Concrete Pipes UG

Supplied without connecting hoses to the fork lift truck.

- Makes the handling of concrete pipes after production far more efficient.
- Due to large surfaced pressure pads, little pressure is exerted onto the pipe, meaning that green products can be safely handled.
- As the pipes are turned in a raised position, there is no danger of damaging the joints or the steel pallets.
- The parallel movement of the gripping arms means little space is required between the pipes.
