

GH-ERGO

Rubber Hammer GH-ERGO

Now with extra long handle for ergonomic working.

The GH-ERGO is equipped with two different rubber elements. One side is equipped with a rectangular, slightly bevelled profile. This way the rubber profile hits the stone flat without the user having to stand too close to the edge of the stone layer. On the second side, the profile is tapered, this enables an accurate strike, e.g. into the grooves of H-stones.

- The extension of the hammer handle from the previous 800 mm to 1000 mm (31½ to 39½ inch) enables an ergonomically upright posture and thus fatigue-free working.
- By using special butyl rubber elements, wrists and elbows are now also protected. The unpleasant springing back when striking is completely eliminated by the damping without reducing the striking power.
- A further helpful feature is the plastic protective disk. This allows height corrections of individual paving stones or slabs that are too high to be made by tapping them on the face without damaging the stone surfaces.

Type	Dead Weight kg (lbs)	Length mm (in)	Order-Number
GH-ERGO	2.9 (6)	1,000 (39¼)	51800113
GH-ERGO-K	2.5 (6)	400 (15¾)	51800114

Spare Parts:

Type	Description	Order-Number
Rubber cover	for GH-ERGO (2 x bevelled), per piece	36330327
Rubber cover	for GH-ERGO (1 x bevelled), per piece	36330328
Plastic disc	Protective disk for stone (for GH-ERGO)	33250280
Rubber cover	for version GH/GH-K (Order-No. 51800012/51800051), per piece	41800006

SXH-1,8

Soft-face mallet SXH-1,8

NEW

Universally suitable for a wide range of applications in landscaping and trade.
The indispensable companion on the construction site.

- Two-part housing made of cast steel.
- High-quality, ergonomically shaped wooden handle.
- Replaceable, low-wear impact inserts: 1 x black medium hard rubber and 1 x red hard plastic head.

Type	Diameter outside mm (in)	Dead Weight kg (lbs)	Length of Handle mm (in)	Order-Number
SXH-1,8	60 (2¼)	1.8 (4)	330 (13)	51800130
