## Sweeping Broom EB

For efficient sand sweeping after the laying of block pavers. Fastest filling of the joints by innovative system of brush-arrangement.

- This sweeping broom does not only brush the sand horizontally into the joints, but also diagonally. So the sweeping is a one-way procedure.
- Surplus of sand can easily be moved further on.
- With attachment device for laying machine VM 203/204/301/401 as well as for fork attachment.
- The broom can easily be attached to any other carrier – wheel loader, for example.
